- The engine performance is as per GB/T2820
- Ratings are based on GB/T1147.1.

• Prime Power:

-There is no time limit in the case of variable load operation. In any 250hours of continuous operation period, the variable load of average work load less than 70%of the prime power.

The operation time in the situation of 100%prime power no more than 500 hours. Permit 10%overload running 1 hours in any 12 hours of continuous operation period. The overload 10% power running time of every year no more than 25 hours.

• Standby Power:

-The annual total standby power load should be less than80% and the average running time shall be less than 200 hours. Among them the standby power point should be no more than 25 hours a year.
